

The Kite attaches to the 225 ft. Leader at the tow point on the kite. The tow point on the ITW Levitation kites is fabric. The tow point on the Gomberg DC Conyne kites is string.

Kite, Line, and Aeropod Connections

The 225 ft. Leader attaches the kite to the Running Line at the Attachment Ring. The Running Line is the main line coming off the Line Spool.

The Aeropod attaches to the 15 ft Aeropod Leader. That leader attaches to the Attachment Ring between the Running Line and the 225 ft Leader.
